## McCabe Road Bridge to Close

The McCabe Road bridge over the Huron River will be closed to vehicular traffic on April 4, 2019. This single lane bridge has been the subject of more frequent inspection and analysis due to its age and condition.

The bridge is likely to remain closed during further detailed evaluation. The bridge was constructed in 1930 and had a major rehabilitation in 1953. The road has a traffic volume of 300 vehicles per day.

The Road Commission has requested state funding to replace the bridge for the last several years. This application process has not been successful due to the statewide bridge problem in Michigan.

The LCRC will evaluate whether the bridge can be opened with further temporary repairs or whether it will remain closed until funding can be identified. The current estimate of cost to replace the bridge is \$2,000,000.

Signs will be placed to alert motorists of the closure. The detour will be Silver Lake Road to Evergreen Road to McCabe Road.
